# FAUX STONE PANELS

If you are looking to up your curb appeal, fancy up your living room, or just a feature wall, these Faux Stone Panels are up to the task.

## FAUX STONE? FAUX REAL.

### FAUX STONE PANELS

Quality Stone Faux Stone Panels are the most realistic faux stone panel on the market. Each panel is molded from real laid stones, then hand painted for an authentic finish. The panels are tongue and groove ensuring for a proper fit and easy install.

No matter what your next reno project, Quality Stone Faux Stone panels can fit the bill.

## STYLING AND PROFILING.

Faux Stone Panels are available in 3 profiles, with 6 colors each.

### STACKED STONE

The deep clean lines of Stacked Stone provides a modern rustic feel, reflecting the natural beauty of stacked slate.

### RIDGE STONE

The versatile look of Ridge Stone allows it to fit elegantly into any traditional or contemporary design.

### LEDGE STONE

The soft lines and smooth textures of Ledge Stone creates a bold and rugged mountain feel.

# BENEFITS OF FAUX STONE

## **EXTREMELY LIGHTWEIGHT**

Weighing in at about 1 lb. per square foot, this featherweight panel can be installed anywhere.

## **COST SAVINGS**

Putting this up in a fraction of the time and with no support makes thing easy and saves money.

## **LOOKS LIKE THE REAL THING**

Once installed, all screws or nails are hidden, providing the finished look of real stone and brick.

## **IMPACT RESISTANT**

High traffic areas aren't a problem for these panels.

## **INDOORS, OR OUT.**

High-density polyurethane can be used both indoors or out. Doesn't crack, fade, or break down.

## **WATER PROOF**

Using a closed cell technology, the panels won't absorb liquid.

## **THERMAL & ACCOUSTIC INSULATION**

Being a high-density closed-cell polyurethane provides great thermal and acoustical insulation value.
